

Advance Work Notice – Mangreen Lane, Swardeston – Road Closure

Upcoming Works

As part of our work to prepare for construction of the Hornsea Three cable route, we will be installing access points across the length of the route. These access points allow for our construction traffic to access the works area via the public road system.

To facilitate these works, we will be temporarily closing **Mangreen Lane, Swardeston** between the following dates:

Monday 3 June to Wednesday 12 June 2024, at all times.

During this time a temporary diversion route will be in place. The diversion route can be found overleaf. Market Lane will be closed to through traffic, but local access will be maintained, up to where the team is working.

If you are concerned about accessing your property during this time, please contact us using the details at the end of this letter.

If you have any questions about the map provided, or would like to request a clearer version, please contact us on the number or email provided overleaf.

What to expect

- You might see us working on site during the day. Our working hours are 7:00 to 18:00, Monday to Friday, and 7:00 to 13:00 on Saturdays.
- Some low-level noise from onsite machinery during working hours.

What we will do

- Keep all sites safe and secure, while keeping disruption to a minimum.
- Answer your questions via our community phonenumber and mailbox.

Please note that all our works are subject to site and weather conditions and all the dates in this notification are subject to change.

Get in touch

We're committed to keeping you informed about our work. We want to be a good neighbour and try to minimise the impacts of our work on the community. If you'd like to get in touch, please email us at community@hornsea3.co.uk or call us on 0800 158 2354.

About us

The Ørsted vision is a world that runs entirely on green energy. Ørsted develops, constructs, and operates offshore and onshore wind farms, solar farms, energy storage facilities, renewable hydrogen and green fuels facilities, and bioenergy plants.

The Hornsea Three wind farm received development consent in December 2020. Hornsea Three, once complete, could provide clean power to over three million UK homes. It will make a significant contribution towards meeting the UK's net zero commitments and we're committed to working closely with stakeholders and local communities as we take the project forward.
